| • Master Data Management | • User Access & System Administration |
| • Troubleshooting & Issue Resolution | • Tax & Accounting Operations |
| • Sales & Transaction Reporting | • Microsoft Office & Business Reporting |
| • Cross-Functional Coordination | • Data Accuracy & Process Compliance |

PROFESSIONAL EXPERIENCE

Accounting System Officer | Belo Medical Group

June 2025 – August 2026

- Administered and supported Microsoft Dynamics 365 Business Central, assisting with day-to-day accounting system operations, user concerns, data maintenance, and system-related issues.
- Managed employee, vendor, and master data, ensuring accurate, complete, and up-to-date information within the accounting system.
- Performed user administration, including blocking and deactivating resigned employees to maintain system security, data integrity, and proper access control.
- Provided first-level troubleshooting and technical support for Business Central errors and user-related concerns, investigating issues and coordinating appropriate resolutions.
- Managed and maintained POS systems, including product/item setup, pricing updates, tender types, MOP (Mode of Payment) configurations, and system settings.
- Monitored monthly POS readings and sales data to help ensure transaction and reporting accuracy and completeness.
- Assisted with POS and accounting-system setup and configuration requirements for newly opened stores.
- Added and maintained new products/items and corresponding pricing and item information in POS systems.
- Performed daily sales and statement posting while monitoring transactions for accuracy and completeness.
- Maintained vendor records and assisted with BPC points and other system-related records as required.
- Worked closely with the Accounting System Manager, Finance team, and end users to resolve system issues and support reliable accounting-system operations.
- Supported continuous improvement of computerized accounting systems by helping align system data and processes with business requirements.

Tax Operations Specialist | Belo Medical Group

November 2020 – May 2025

- Reconciled daily sales collections recorded by Treasury against POS e-journal transactions by terminal to ensure data accuracy and completeness.
- Validated sales and investigated discrepancies in POS reports, coordinating with IT and Treasury teams to resolve system or transaction issues.
- Finalized sales data using actual transaction records for BIR e-sales reporting, monthly and quarterly VAT returns, and annual income tax reporting requirements.
- Monitored POS running balances and transaction reports, identified irregularities, and escalated exceptions for timely correction.
- Maintained accurate operational records and supported data-driven reporting for tax, accounting, and management requirements.
